## SHIP REPAIR & SUPPLY LLC. CO.

Dock Side is a globally active maritime company based in Istanbul, dedicated to delivering reliable and efficient technical services to the international shipping industry.

Established to meet the growing demands of the Ship Management sector both in Turkey and worldwide Dock Side brings together a highly experienced team of professionals with decades of expertise across various roles in the maritime field.

We take pride in uniting this strong team under one roof to provide tailored, high-quality solutions to our valued clients. Our commitment to operational excellence, regulatory compliance, and customer satisfaction continues to drive our global reputation in ship repair, retrofit, and technical support services.

# WHAT DO YOU KNOW ABOUT OUR COMPANY?

## A B O U T   U S

Dock Side, we proudly operate as a trusted and experienced provider of marine engineering, repair, and technical supply services. With many years of accumulated industry knowledge and a highly skilled team, we are committed to delivering reliable, high-quality solutions to the global maritime sector.

Our mission is to support shipowners, managers, and operators with services that combine technical excellence, regulatory compliance, and operational efficiency. From emergency repairs to planned retrofits and spare parts logistics, we offer end-to-end support tailored to the unique demands of each vessel.

# VISION & MISSION

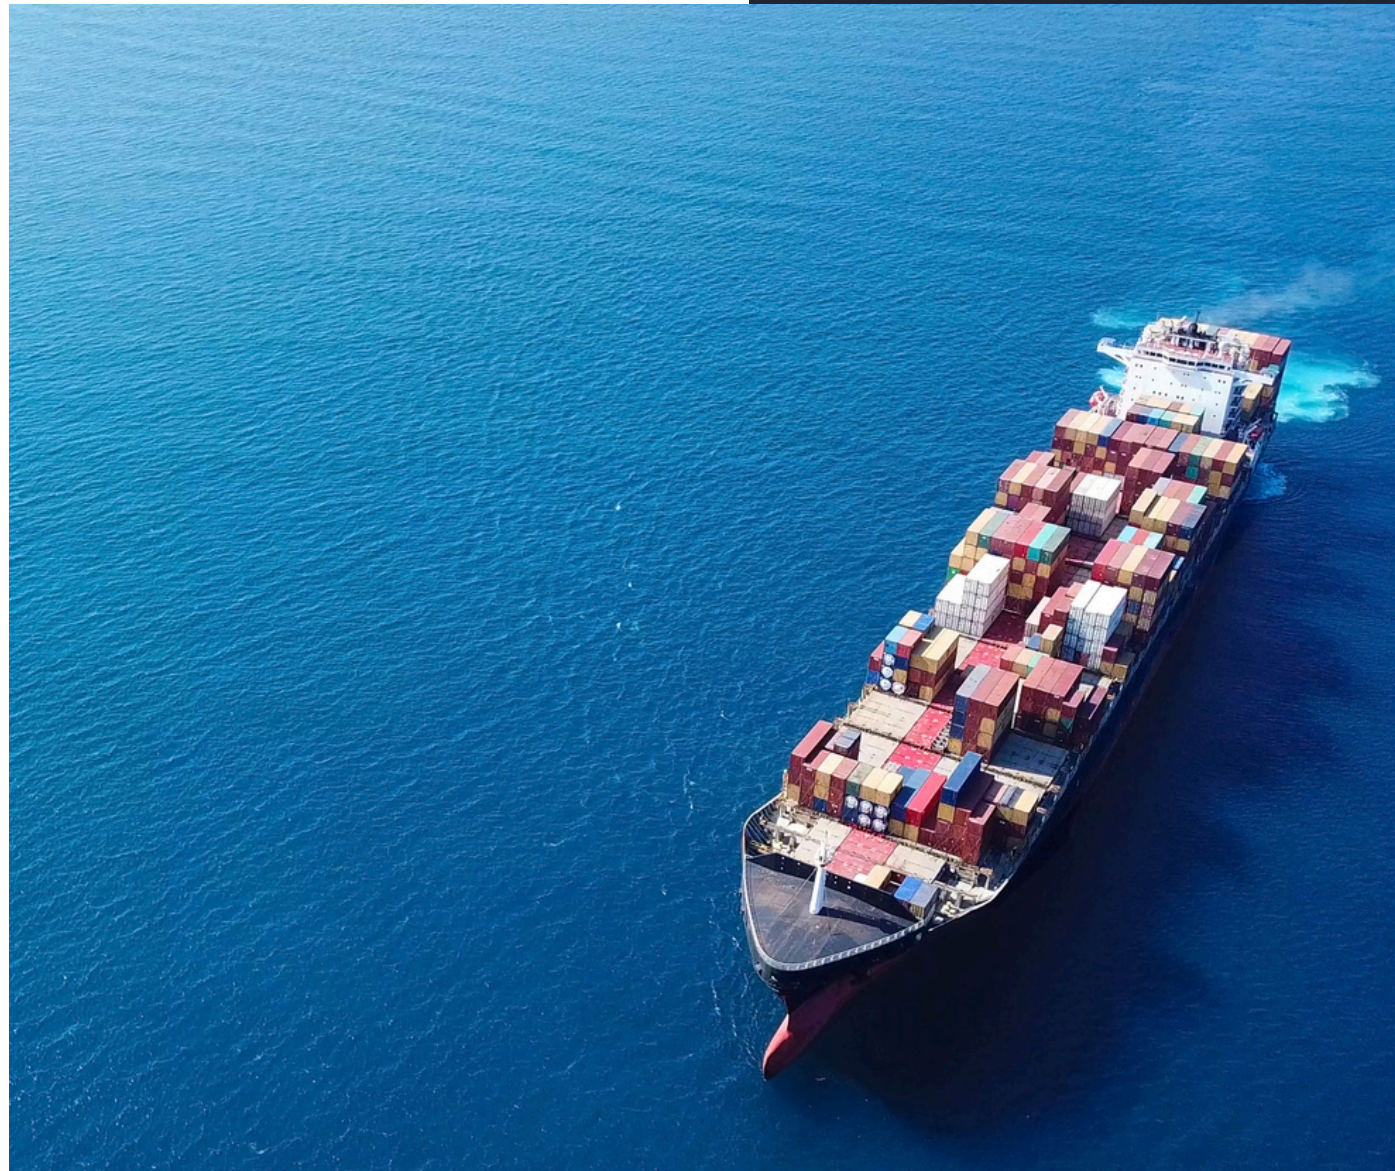

## O U R V I S I O N

Dock Side, our vision is to become a globally recognized and trusted brand in the maritime industry. We are committed to upholding the highest ethical standards and prioritizing customer satisfaction in every aspect of our operations. Our aim is to be one of the most respected and preferred solution partners for shipowners and maritime professionals worldwide.

## O U R M I S S I O N

Dock Side, our mission is to deliver comprehensive, reliable, and high-quality solutions in ship maintenance, repair, and technical supply to our clients across the maritime industry. We approach every project with passion, precision, and a commitment to excellence.

By understanding the unique needs of each customer, we offer personalized services that go beyond expectations ensuring operational continuity, regulatory compliance, and long-term value for our partners at sea.

# WHY CHOOSE US

## EXPERIENCE AND EXPERTISE

Dock Side, we bring together a highly skilled team with deep-rooted experience in ship maintenance, repair, and technical supply. Our understanding of maritime operations enables us to deliver precise, reliable, and high-quality services tailored to the industry's evolving needs.

## GLOBAL NETWORK

Headquartered in Istanbul and supported by a global service network, Dock Side is well-positioned to reach and support clients across major maritime regions. Whether docked or at sea, our operational reach ensures timely service wherever your vessel operates.

## SOLUTION-ORIENTED

Recognizing that each vessel and operation is unique, we develop customized solutions for every project. From emergency repairs to planned retrofits and regulatory compliance, we deliver services that solve problems—before they become delays.

## RELIABILITY

We operate with a strong commitment to reliability and customer satisfaction. Every project is handled with care, precision, and transparency—ensuring on-time delivery and full alignment with client expectations and maritime standards.

## QUALITY STANDARDS

Dock Side, we uphold the highest quality standards in all our services. Continuous improvement, industry best practices, and international compliance form the foundation of our work—ensuring operational excellence and client confidence.

# SERV

## SHIP REPAIR & TECHNICAL SERVICES

Dock Side, we place strong emphasis on reliable and efficient technical services in ship repair and maintenance. We understand that vessels and marine structures undergo natural wear over time making periodic maintenance and professional intervention essential for operational safety and performance.

## SURVEY SERVICES

Dock Side ensures uninterrupted vessel performance through experienced supervision. Our experts lead Dry-docking, Mechanical, Electrical, and Retrofit operations including BWTS and EGCS systems delivering quality and consistency across all project phases.

# VICES

## DRY DOCK SERVICES & SHIPYARD BROKERAGE

Dock Side, we provide seamless coordination for dry dock operations and act as a reliable bridge between shipowners and shipyards worldwide.

Our team ensures smooth execution of docking procedures, repair planning, and yard communication, helping clients reduce operational downtime. Through our global network, we assist in selecting the most suitable shipyard based on project scope, classification, and geographical needs.

We manage all phases of the dry docking process, including specification preparation, cost control, technical supervision, and progress reporting ensuring transparency, quality, and timely completion.

## TECHNICAL & SHIP SUPPLY SERVICES

Dock Side offers end-to-end technical and ship supply services designed to support operational continuity at sea and in port.

We provide:

- Marine Spare Parts: OEM and alternative parts for engines, pumps, compressors, valves, and more
- Consumables & Tools: Safety equipment, filters, gaskets, seals, oils, PPE, and technical tools
- Global Delivery: Fast and reliable logistics coordination to deliver ship stores worldwide
- Compliance Support: Supplies meet IMO, SOLAS, and MARPOL requirements as applicable

Our experienced supply team works closely with clients to ensure availability, quality, and delivery performance—every time.

# SHIP REPAIR & TECHNICAL SERVICES

---

Dock Side, we specialize in delivering comprehensive ship repair and technical services that meet the demanding standards of the global maritime industry.

Vessels are continuously exposed to extreme conditions, leading to structural and mechanical wear. To maintain operational reliability, safety, and regulatory compliance, timely and professional repair and maintenance are essential.

Our experienced technical team, supported by advanced tools and infrastructure, offers fast, high-quality solutions in all major disciplines, including:

- Hull and structural steelwork
- Pipe fabrication and system restoration
- Mechanical repairs (pumps, valves, engines)
- Electrical and automation components

Whether in drydock, alongside, or during voyage, Dock Side ensures minimal downtime and maximum vessel performance—delivering tailored solutions with precision and care.

# WHAT DO OUR SERVICES INCLUDE?

- Hull Repairs & Steelwork Renewal
- Pipe Fabrication & Replacement
- Mechanical Equipment Overhaul
- Engine Maintenance
- Electrical & Automation Services
- Underwater Repairs
- Dry Dock Supervision
- Emergency Voyage Repairs

# SURVEY SERVICES

---

Dock Side, we provide expert survey and supervision services to ensure that every phase of your vessel's technical operations is performed with precision, efficiency, and compliance.

Our Dry Docking Superintendents and Assistant Superintendents oversee every detail of the docking process from planning and yard coordination to execution and final reporting. Their meticulous approach minimizes downtime and ensures seamless workflow during shipyard periods.

In addition, our Mechanical Surveyors offer comprehensive supervision of propulsion and auxiliary systems. Their hands-on expertise covers machinery alignment, equipment overhauls, and performance evaluations helping your vessel maintain optimal operation and regulatory readiness.

By combining technical oversight with operational insight, Dock Side's survey team adds measurable value to your drydocking, retrofit, or maintenance projects.

# WHAT DO OUR SERVICES INCLUDE?

## **Dry Docking Supervision**

End-to-end oversight of drydocking operations, from planning and execution to final inspections.

## **Pre-Docking Condition Surveys**

Detailed assessment of vessel condition before docking to ensure proper planning and scope definition.

## **Mechanical System Supervision**

Monitoring and evaluation of propulsion systems, auxiliary engines, pumps, and other critical machinery.

## **Class Renewal & Compliance Surveys**

Support for statutory and classification society inspections (IMO, SOLAS, MARPOL compliance).

## **Pre-Purchase & Condition Surveys**

Independent inspection of vessel condition and machinery for investors, buyers, or technical managers.

## **Onboard Repair Supervision**

Technical monitoring of shipboard repairs and retrofits during voyage or at berth.

## **Reporting & Documentation**

Delivery of structured reports with photographic evidence, technical findings, and recommendations.

# DRY DOCK SERVICES & SHIPYARD BROKERAGE

---

Dock Side, we proudly offer expert dry dock coordination and shipyard brokerage services to ensure the efficient execution of your vessel's repair, maintenance, or retrofit operations.

With years of experience operating across key ports, our team facilitates smooth collaboration between shipowners and trusted shipyards worldwide. We handle every step of the process from shipyard selection and specification review to project scheduling and final delivery.

Our shipyard brokerage service acts as a strategic bridge between shipowners and shipyards. Through precise consultancy and coordination, we help clients find the ideal facility for dry docking, steelwork, mechanical overhauls, retrofits, or full conversions.

Whether for routine maintenance or complex projects, Dock Side ensures transparency, cost-efficiency, and technical excellence throughout every shipyard engagement.

# WHAT DO OUR SERVICES INCLUDE?

## **Dry Dock Planning & Reservation**

We identify the most suitable shipyard based on your vessel type, timeline, and scope of work then handle slot reservations and technical planning to ensure a seamless docking process.

## **Specification Review & Project Coordination**

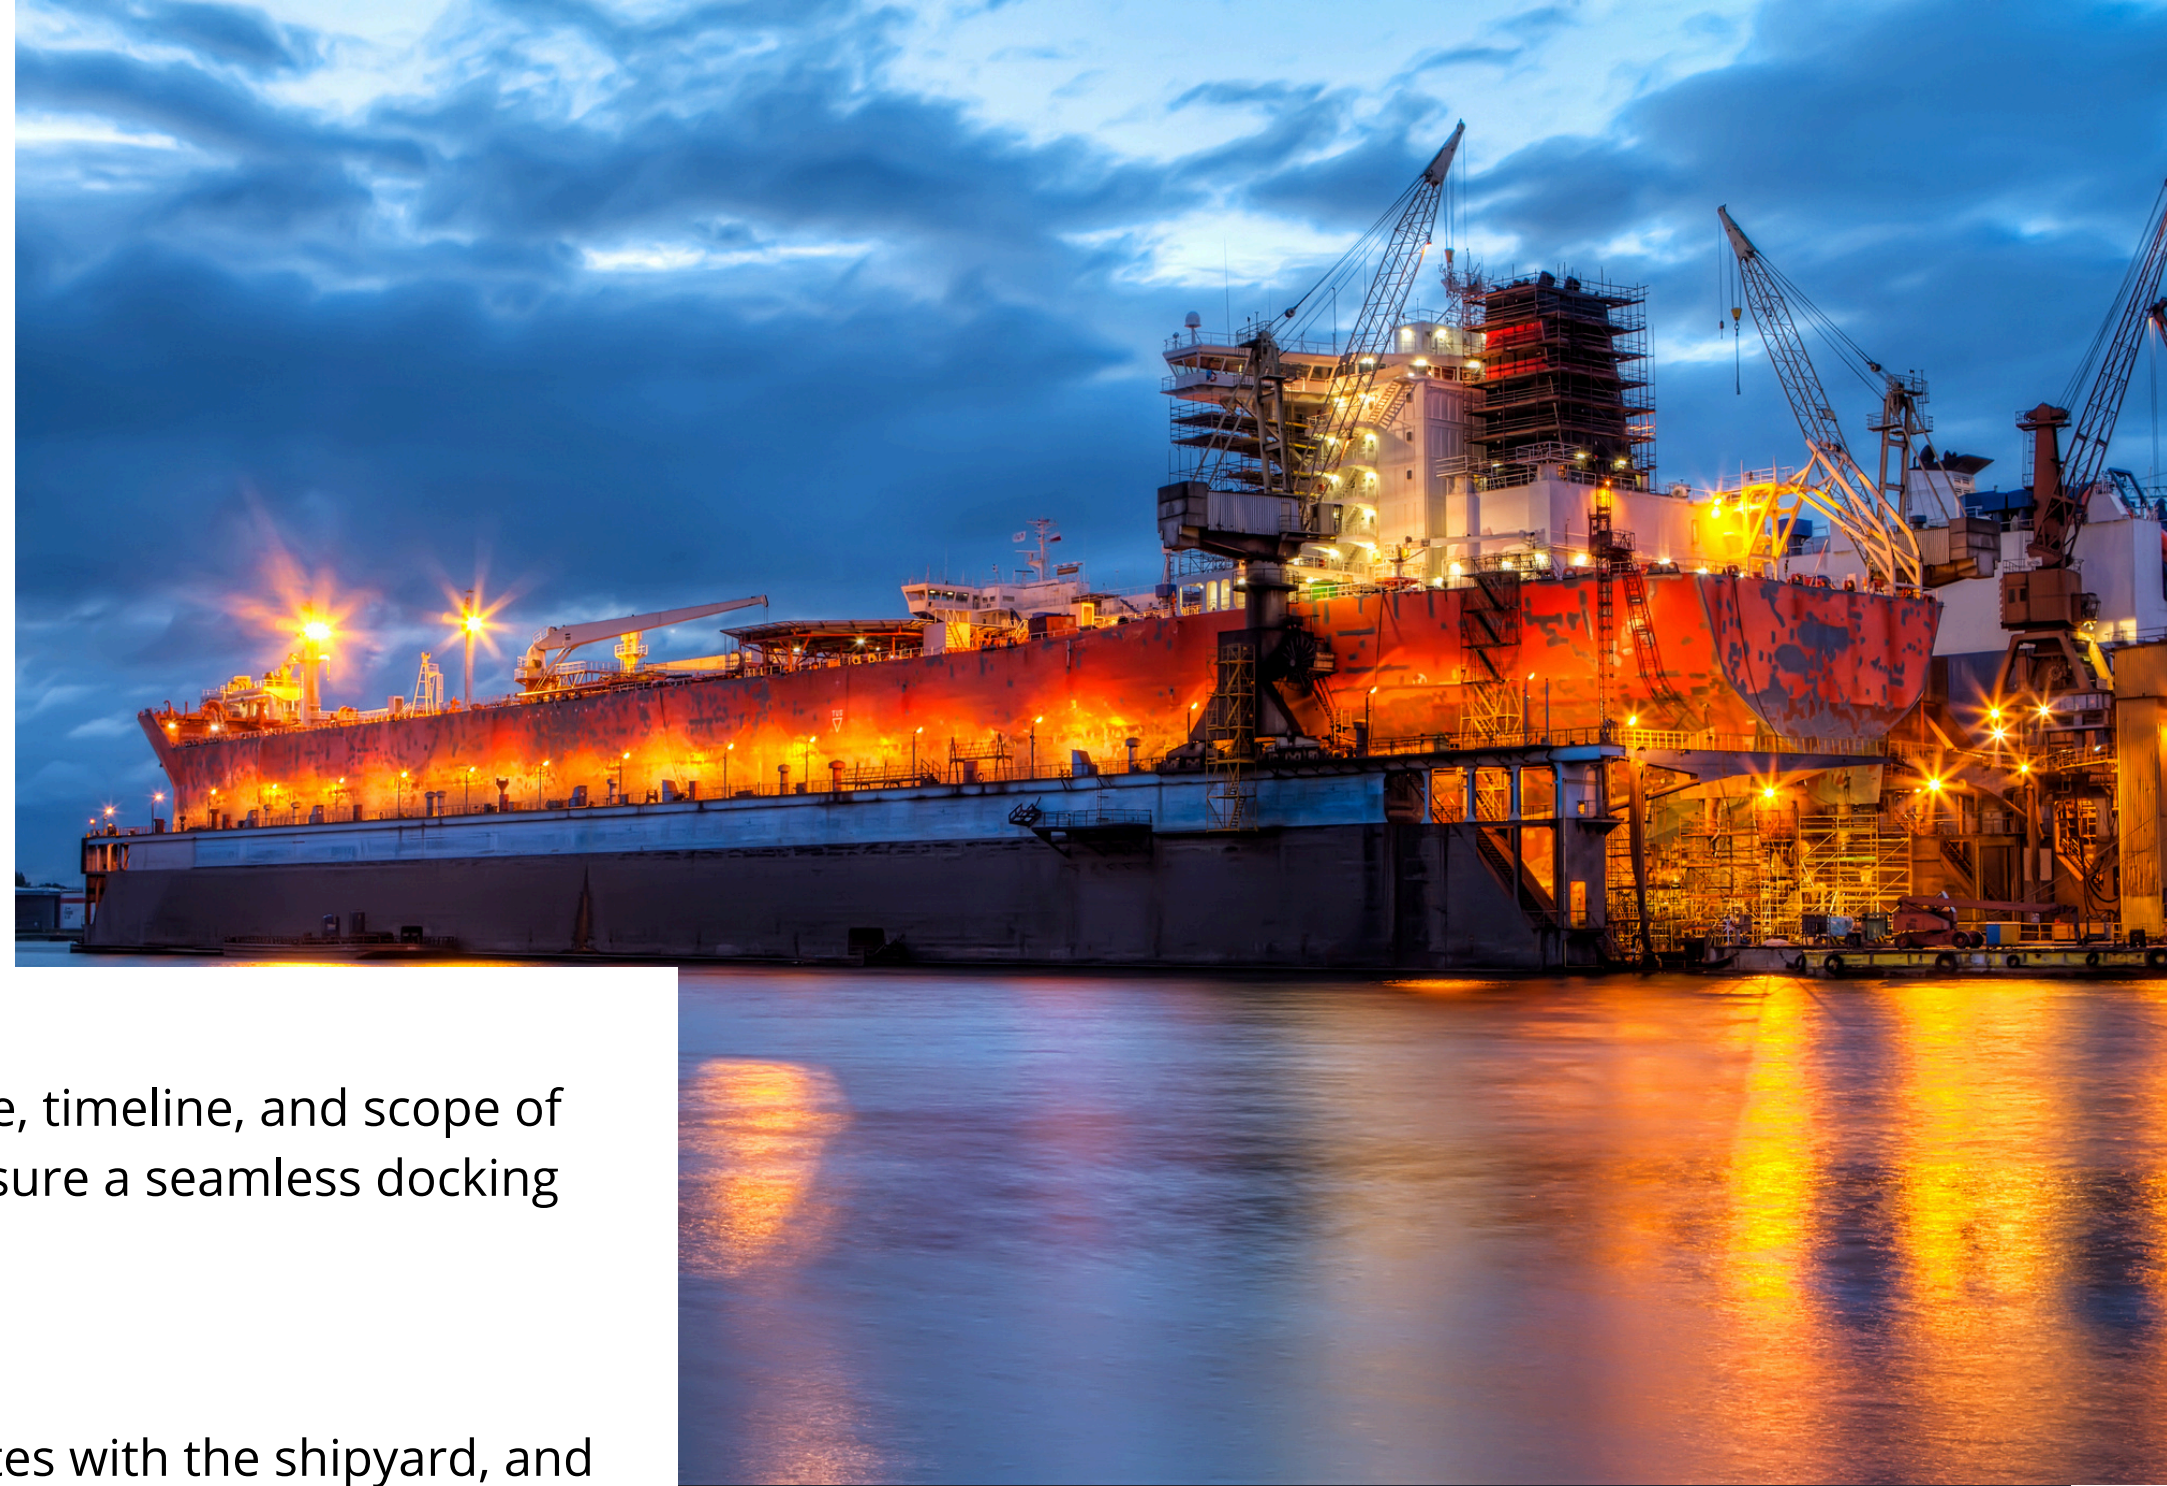

Our team reviews and optimizes repair specifications, coordinates with the shipyard, and prepares all documentation needed for cost-effective and efficient execution.

## **On-Site Supervision & Technical Oversight**

We provide experienced superintendents to monitor daily operations, control progress, and ensure adherence to class standards and safety protocols throughout the docking period.

## **Commercial Support & Post-Dock Reporting**

From shipyard negotiation to final invoicing and delivery reports, we ensure transparency, quality assurance, and full documentation of the entire dry docking project.

# TECHNICAL & SHIP SUPPLY SERVICES

---

Dock Side, we specialize in delivering reliable and efficient marine supply solutions tailored to the operational demands of shipowners, managers, and maritime professionals.

We take pride in offering uninterrupted, solution-oriented services—providing a wide range of technical equipment, spare parts, consumables, and tools to ensure vessels remain fully operational at sea and in port.

With extensive industry experience and a vast supply network, our Technical Supply Department ensures fast sourcing and timely global delivery of:

- OEM and alternative spare parts for engines, pumps, valves, and automation systems
- Marine safety equipment, tools, and personal protective gear
- Electrical, hydraulic, and deck machinery components
- Technical consumables and shipboard maintenance materials

We operate with a customer-first mindset, aligning every supply operation with the specific requirements of your fleet and helping you maintain efficiency, compliance, and readiness across all operations.

# WHAT DO OUR SERVICES INCLUDE?

## **Marine Spare Parts Supply**

Sourcing and delivery of OEM and alternative spare parts for engines, pumps, compressors, valves, filters, and automation systems from trusted global manufacturers.

## **Technical Tools & Consumables**

Provision of essential tools and consumables for shipboard maintenance operations—such as sealants, lubricants, gaskets, abrasives, paints, and tapes.

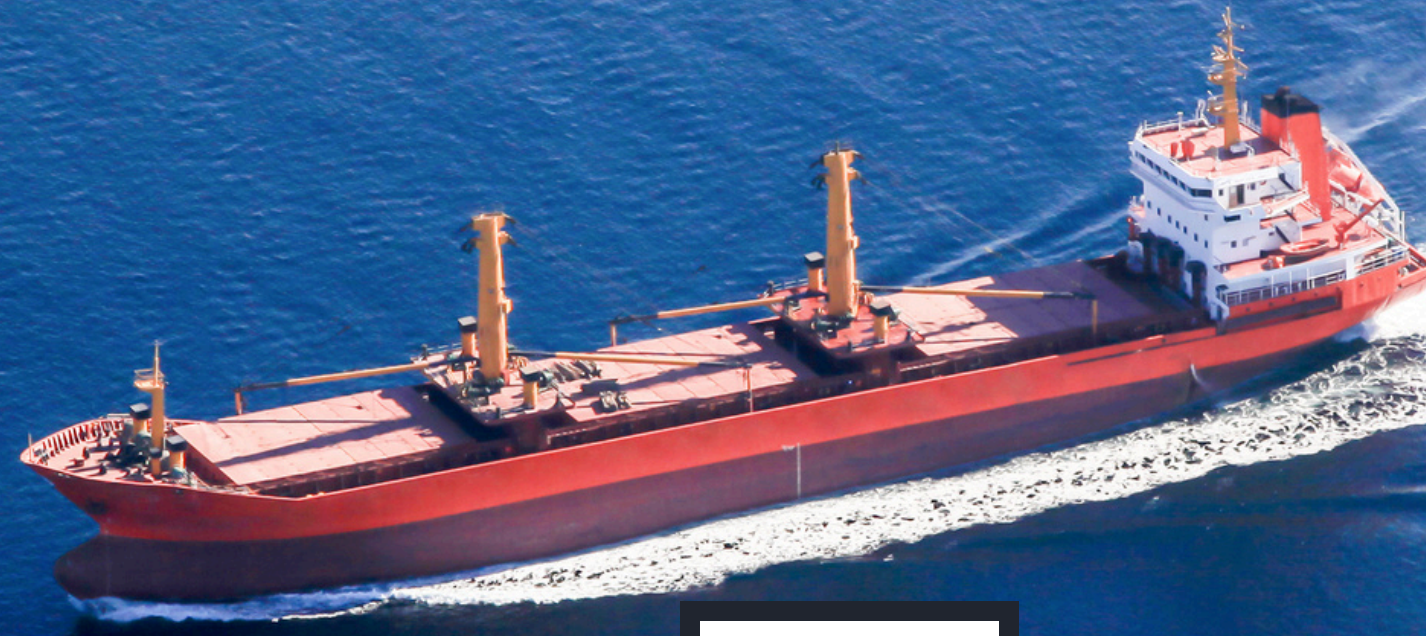

**Safety & Protective Equipment** Supplying SOLAS-compliant life-saving appliances (LSA), firefighting equipment (FFA), and full sets of PPE, including gloves, helmets, harnesses, and gas detectors.

**Maritime Consulting:** With our specialized team in the maritime sector, we offer tailored consulting services to our customers.

**Global Logistics & Delivery** Coordinating fast and reliable worldwide shipment of supplies directly to shipyards, ports, or vessels in operation, ensuring minimal delays and full compliance.

0 1

## PIPE FABRICATION RENEWAL

We are your solution partner on the complex pipeline systems of the maritime world.

Dock Side offers expert design, manufacturing, installation, and renewal of shipboard piping systems, including seawater, ballast, fuel oil, and compressed air lines. Our fabrication services ensure compliance, performance, and durability under harsh marine conditions.

0 2

## SHIP & TANK CLEANING

Ensuring cleanliness, hygiene, and compliance on board.

Our Ship Cleaning division provides tailored cleaning and surface treatment solutions for tanks, engine rooms, cargo holds, bilges, and deck areas. We ensure vessels meet safety and environmental standards while maintaining optimal onboard conditions.

0 3

## RUBBER SERVICE

Reliable protection through advanced rubber solutions.

Dock Side provides specialized rubber-based products and services designed for marine environments. Our solutions ensure sealing, insulation, anti-vibration, and surface protection across a wide range of vessel systems.

Reliable marine boiler maintenance and repair.

Dock Side, we offer inspection, repair, retubing, and cleaning services for marine auxiliary and exhaust gas boilers. Our experienced technicians ensure safe and efficient boiler operation, minimizing downtime and complying with class requirements.

## BOILER SERVICE

0 4

Structural integrity through expert steelwork.

We provide comprehensive hull repairs and steel renewal services, including steel plate fabrication, welding, and surface treatment. Whether afloat or in drydock, our team restores structural strength while meeting all regulatory standards.

## HULL & STEEL RENEWAL SERVICE

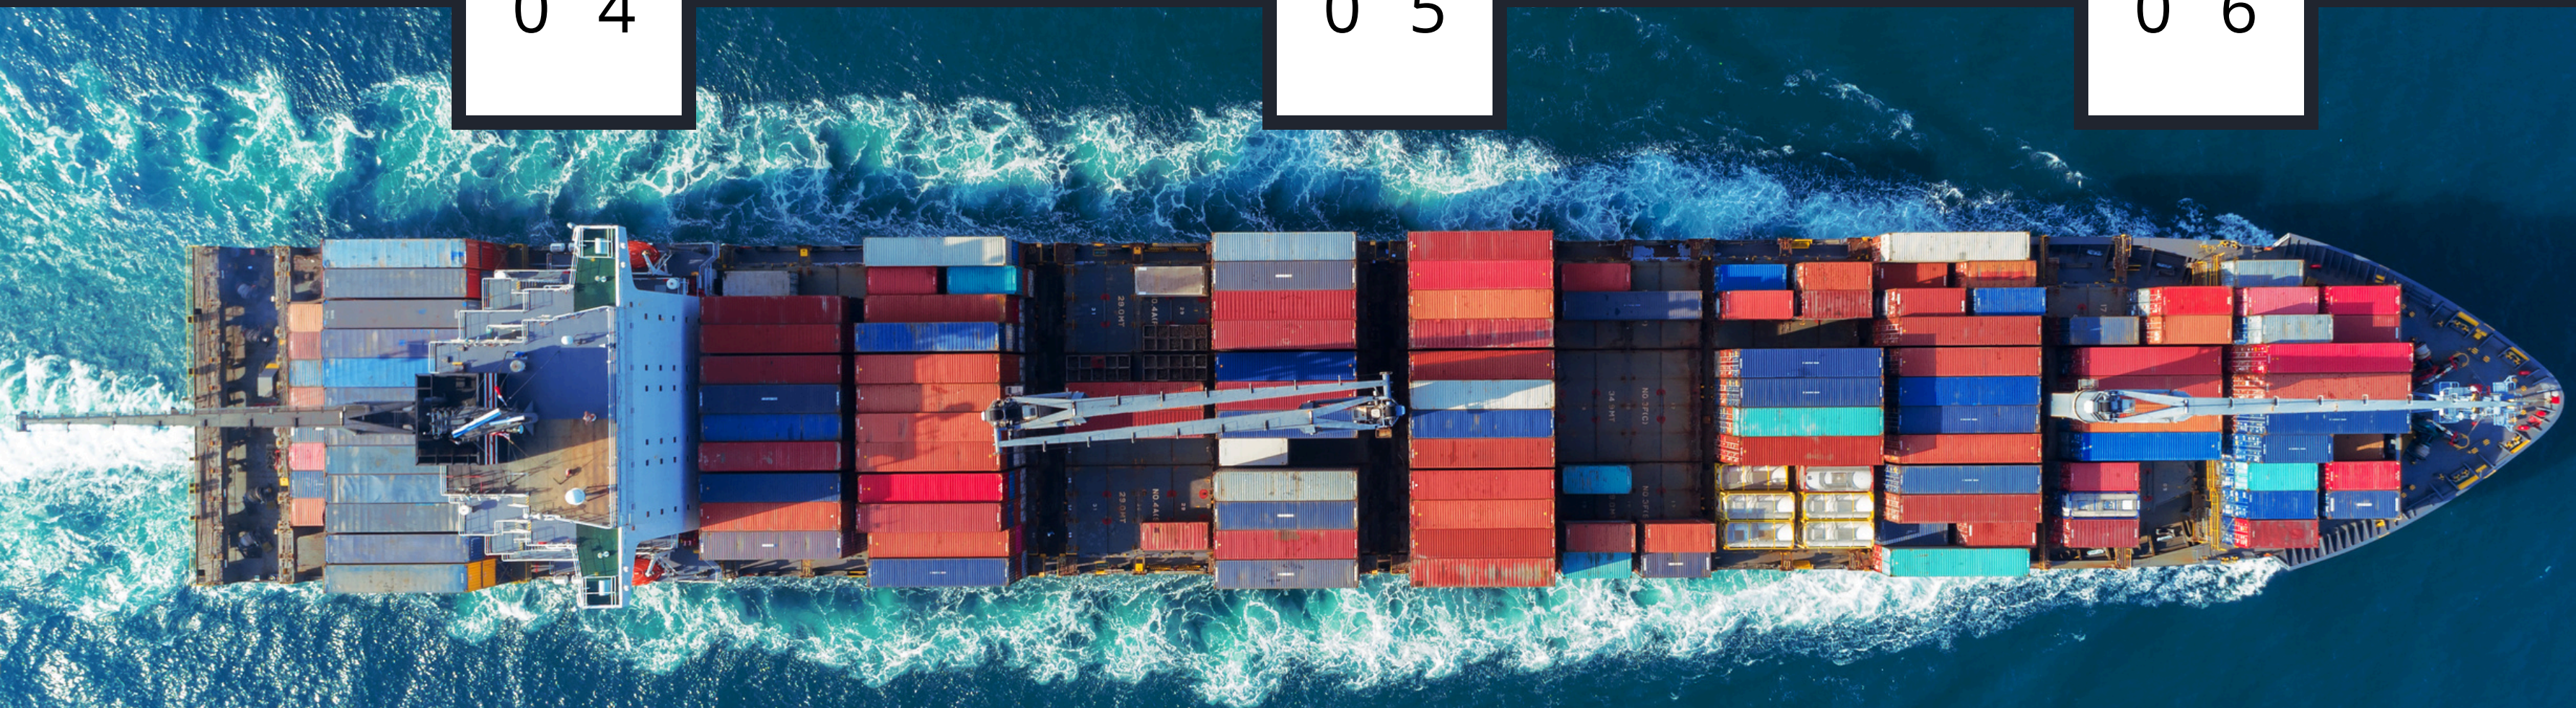

0 5

Precision overhaul for power and efficiency.

Dock Side delivers inspection, calibration, and complete overhaul services for turbocharger governors. We ensure optimal engine responsiveness, fuel efficiency, and reliability using OEM parts and expert testing to meet manufacturer specs.

## TURBOCHARGER GOVERNOR SERVICE

0 6

Dock Side, we provide expert services for the inspection, repair, and calibration of shipboard navigation electronics to ensure safe and accurate voyage operations.

NAVIGATION  
ELECTRONIC SERVICE

0 9

We deliver comprehensive maintenance, inspection, and overhaul services for all types of marine cranes, ensuring reliability, safety, and compliance with international standards.

CRANE MAINTENANCE &  
REPAIR SERVICE

1 0

# PIPE FABRICATION SERVICE

We are with you on the challenging route of the maritime world!

Our company is a leading "Pipe Fabrication-Renewal" service provider specialized in the design, manufacturing, and renewal of pipeline systems in the maritime sector.

In the maritime industry, pipeline systems within ships facilitate the transportation of essential components such as fuel, water, gas, ventilation, and more.

# PIPE FABRICATION SERVICE

## PIPE DESIGN AND ENGINEERING - 0 1

We collaborate with expert engineers to design efficient and safe pipeline systems tailored to the needs of ships.

## PIPE MANUFACTURING AND INSTALLATION - 0 2

We manufacture pipeline systems using high-quality materials and ensure their installation within the ship.

## PIPE RENEWAL AND REPAIR - 0 3

We renew old and worn-out pipeline systems and repair faulty components.

## PIPE TESTING AND INSPECTION - 0 4

We provide testing and inspection services to ensure the efficiency and safety of pipeline systems.

# SHIP & TANK CLEANING

Continuing our leadership in the maritime industry, Dock Side is your destination for ship cleaning.

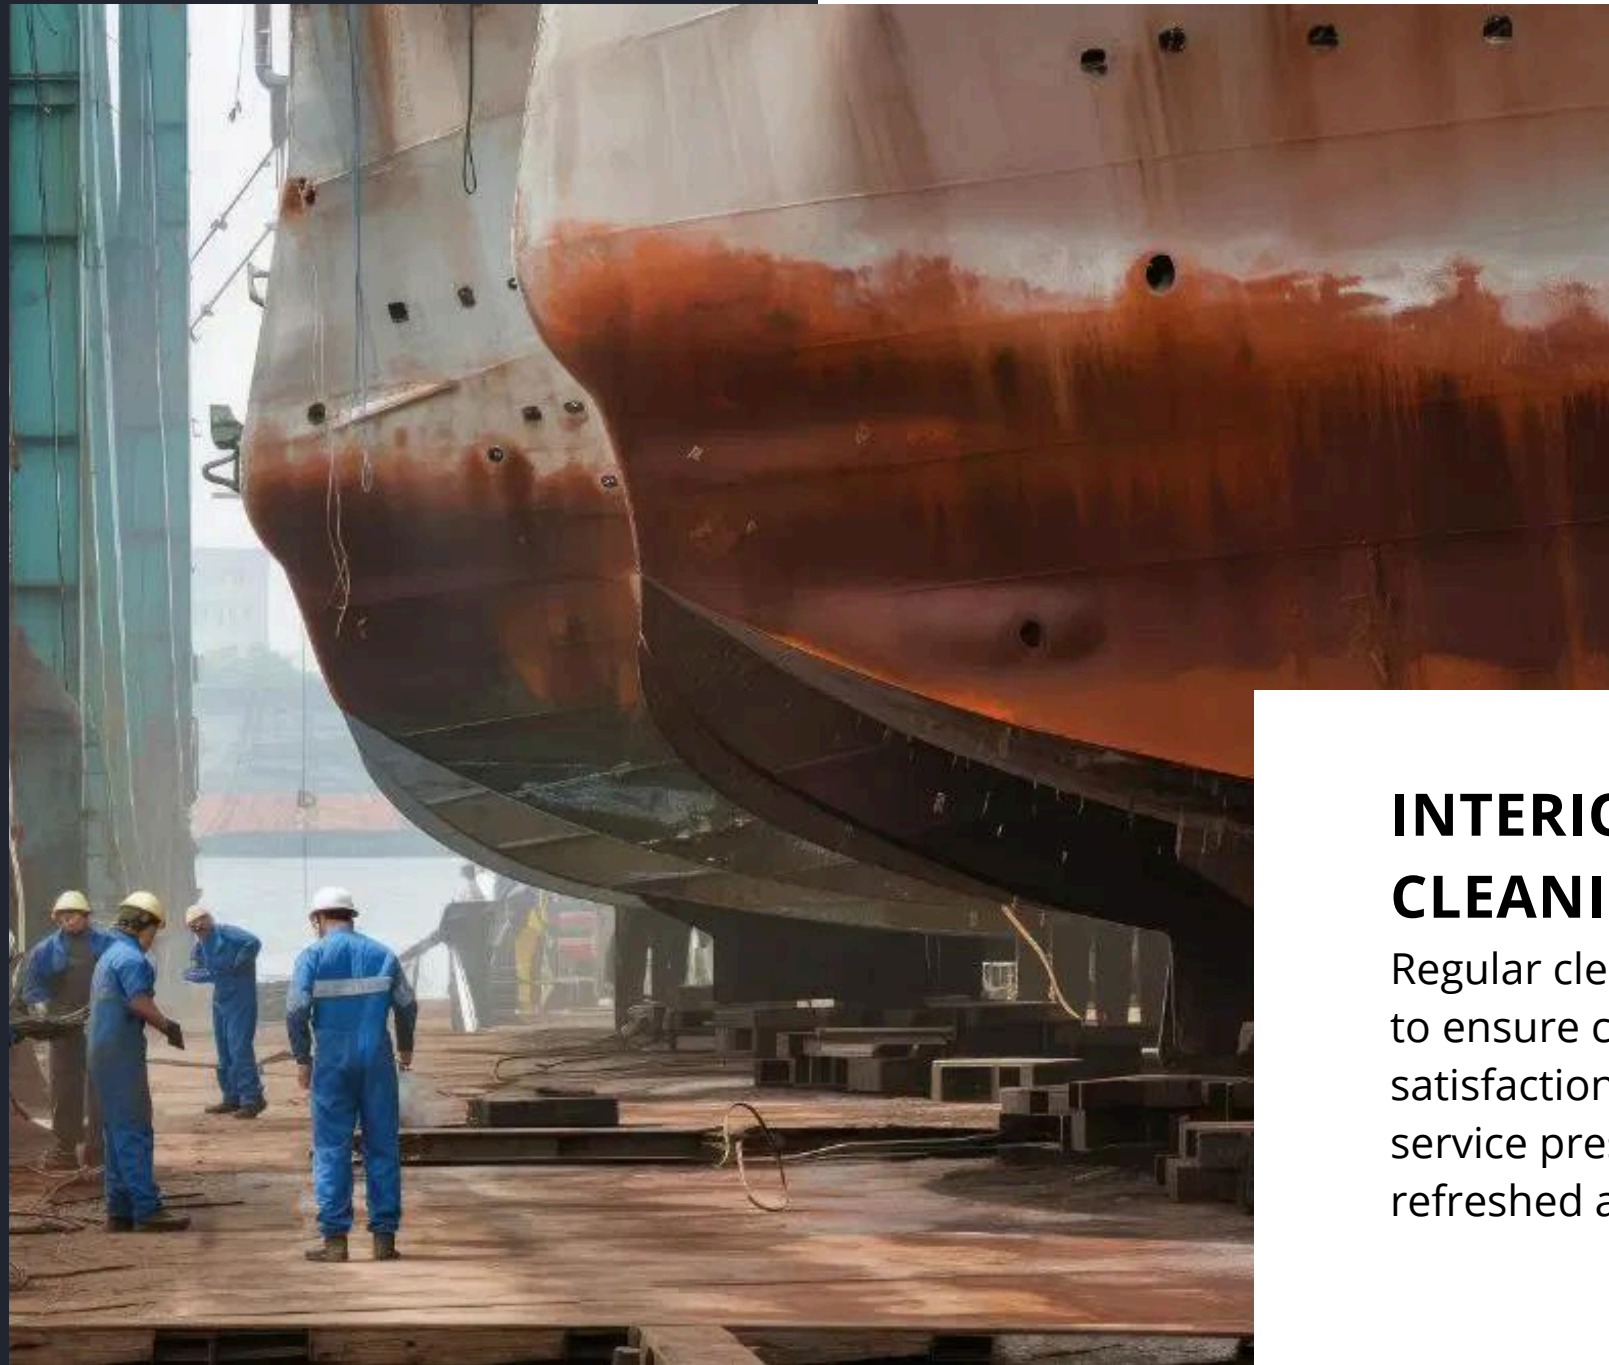

With our Ship Cleaning department, we provide tailored solutions for the cleanliness and hygiene needs of your ship fleets.

Our experienced team and high-quality standards ensure professional cleaning from the exterior to the interior of your vessels.

# SHIP CLEANING EXCELLENCE

## EXTERIOR SURFACE CLEANING - 0 1

Over time, ship exteriors can become dirty and damaged due to salt, lime, and environmental factors. With our ship exterior cleaning service, we conduct cleaning processes that enhance the shine and efficiency of your vessels.

## TANK CLEANING - 0 2

Depending on the cargo, ship tanks can accumulate dirt, sediment, and residues. Through our ship tank cleaning service, we perform effective cleaning processes to maintain cargo capacity and uphold hygiene standards.

## INTERIOR CLEANING - 0 3

Regular cleaning is essential for ship interiors to ensure crew comfort and passenger satisfaction. Our ship interior cleaning service presents your vessels' interiors in a refreshed and clean manner.

## RUST CLEANING AND PREVENTION - 0 4

Rust on ship surfaces can adversely affect performance and lead to serious damages. With our rust cleaning and prevention service, we ensure your vessels are well-protected.

## ENVIRONMENTALLY FRIENDLY CLEANING SOLUTIONS - 0 5

We prioritize environmental consciousness. The products and methods we use for ship cleaning are eco-friendly and sustainable.

# RUBBER SERVICE

Dock Side, we provide specialized rubber-based solutions to support the protection, safety, and operational integrity of marine vessels and platforms.

Our Rubber Services include the selection, supply, and installation of high-performance rubber materials designed for marine environments. These services are critical in ensuring long-term durability, shock absorption, and fluid sealing under extreme operational conditions.

# RUBBER SERVICE

## **RUBBER LINING & COATING - 0 1**

Rubber Lining & Coating for tanks, piping, and cargo areas to prevent corrosion and abrasion

## **ANTI-VIBRATION & SHOCK ABSORBING PADS - 0 2**

Anti-Vibration & Shock Absorbing Pads for engines, pumps, and rotating machinery

## **RUBBER SEALS & GASKETS - 0 3**

Rubber Seals & Gaskets for watertight and airtight closures in hatches, doors, and flanges

## **DECK SAFETY MATS & WALKWAY PROTECTION - 0 4**

Deck Safety Mats & Walkway Protection to ensure crew safety and surface longevity

Dock Side delivers tailor-made rubber solutions backed by technical expertise, quality materials, and seamless installation ensuring that your vessel remains protected and compliant in even the most demanding maritime conditions.

# BOILER SERVICE

Dock Side, we offer specialized boiler services designed to ensure the reliable, safe, and energy-efficient operation of marine steam systems.

Marine boilers are critical components that support heating, fuel treatment, and auxiliary systems onboard. Any malfunction can directly affect a vessel's operability and safety. That's why our expert team provides end-to-end boiler solutions including

# BOILER SERVICE

## **INSPECTION & DIAGNOSIS - 0 1**

Condition assessments, troubleshooting, and reporting in line with class requirements.

## **BOILER RETUBING & WELDING - 0 2**

Removal and renewal of damaged tubes, tube plates, and pressure parts with certified welding procedures.

## **BURNER & AUTOMATION SYSTEM OVERHAUL - 0 3**

Adjustment, calibration, and maintenance of burners, safety valves, pressure controls, and automation units.

## **CLEANING & DESCALING - 0 4**

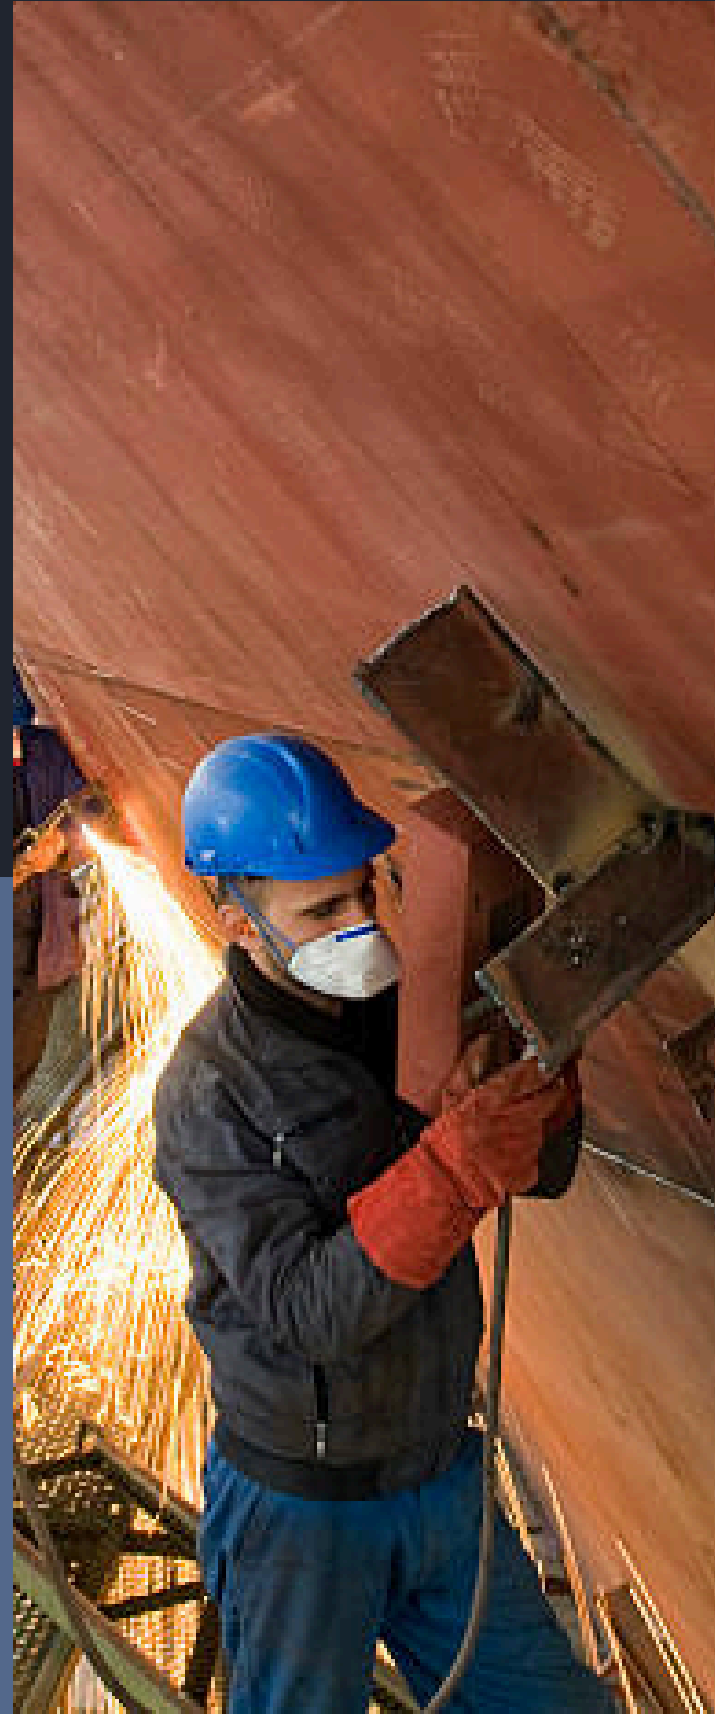

Internal and external cleaning using chemical and mechanical methods to restore thermal efficiency.

# HULL & STEEL RENEWAL SERVICE

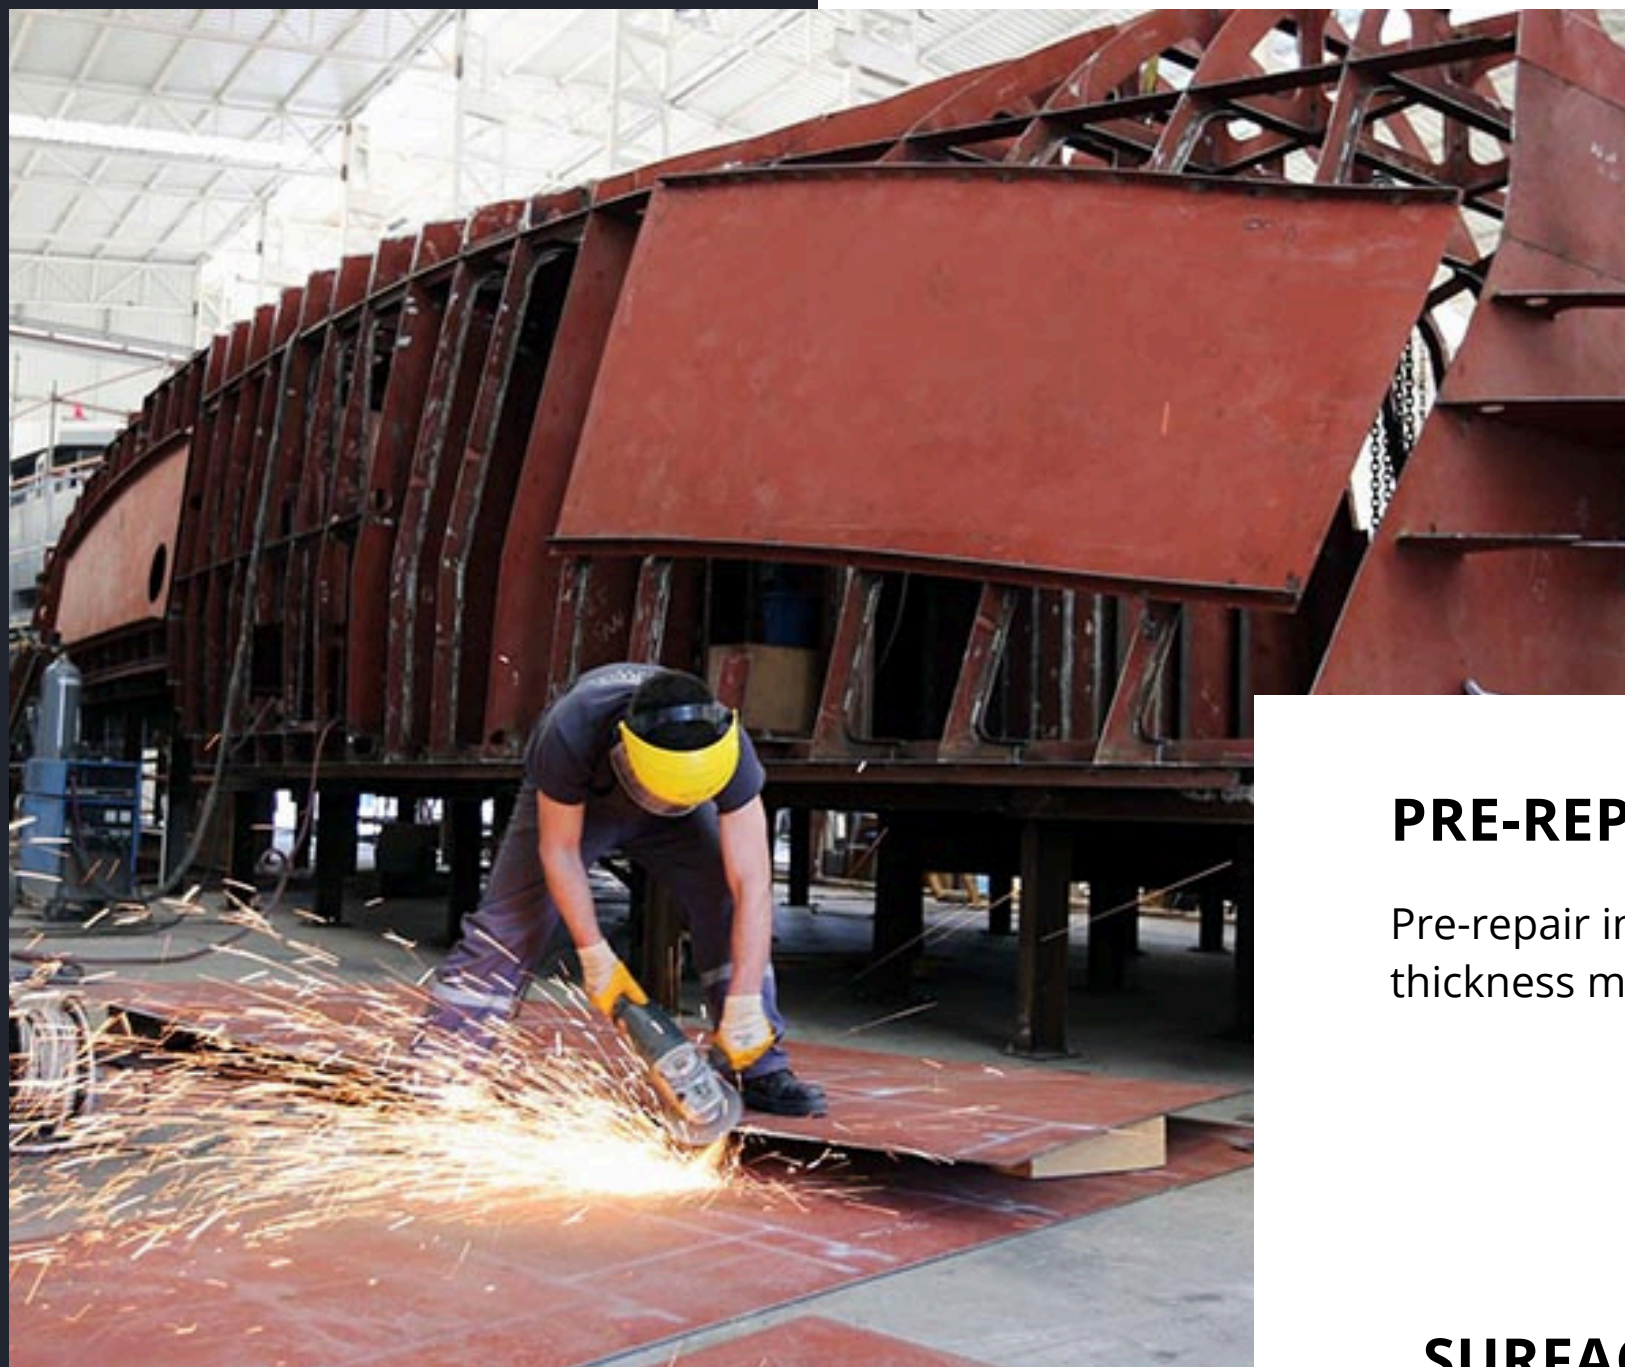

Dock Side, we offer professional hull and steel structure renewal services to ensure the integrity, safety, and seaworthiness of vessels operating under the most demanding conditions.

Over time, corrosion, mechanical stress, and external impact can weaken a vessel's structural components. Our experienced fabrication and welding teams provide class-approved repairs and replacements with minimal operational disruption.

# HULL & STEEL RENEWAL SERVICE

## STEEL PLATE RENEWAL - 0 1

Steel plate renewal for hulls, tanks, decks, and bulkheads

## STRUCTURAL REINFORCEMENT - 0 2

Structural reinforcement and frame fabrication

## PRE-REPAIR INSPECTION - 0 3

Pre-repair inspections using ultrasonic thickness measurement and visual checks

## CLASS-COMPLIANT WELDING - 0 4

Class-compliant welding by certified personnel (AWS, DNV, ABS standards)

## SURFACE PREPARATION & COATING - 0 5

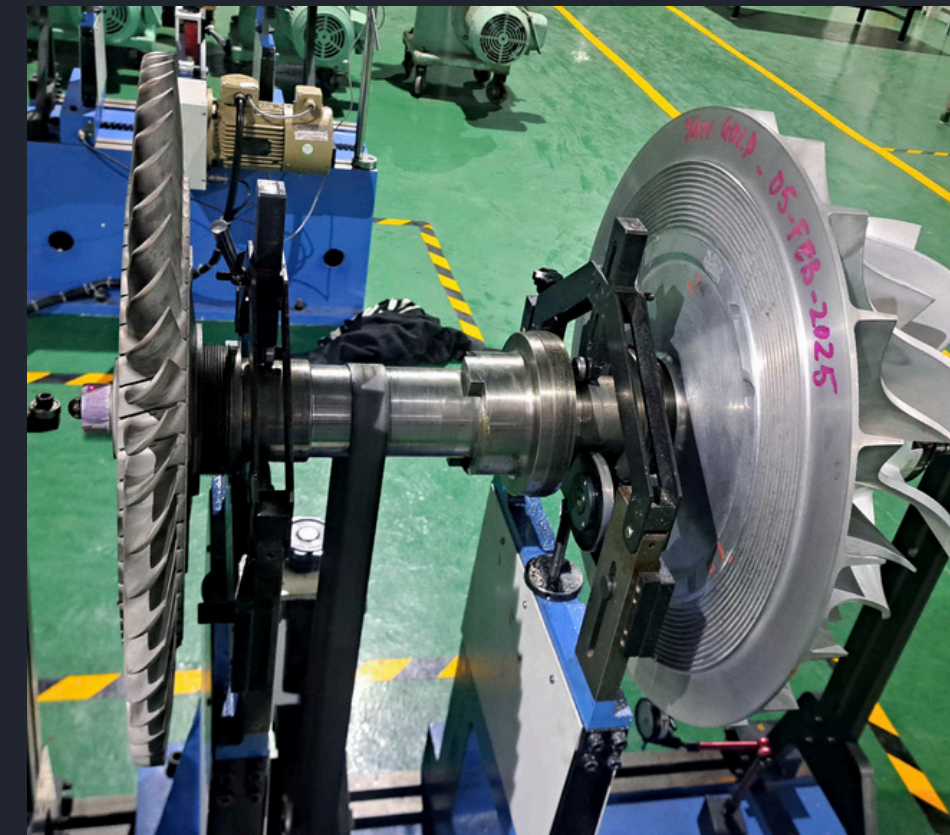

Surface preparation & coating for corrosion protection and paint system reapplication

# TURBOCHARGER GOVERNOR SERVICE

Dock Side, we provide expert services for the inspection, overhaul, and calibration of turbocharger governor systems, which are essential for maintaining optimal engine performance and fuel efficiency.

The governor system plays a critical role in regulating the turbocharger's speed and ensuring smooth acceleration and stable engine operation under varying loads. Faulty or miscalibrated governors can lead to performance loss, fuel overconsumption, or even engine damage.

# TURBOCHARGER GOVERNOR SERVICE

## GOVERNOR SYSTEM

### INSPECTION - 0 1

Detailed assessment of mechanical or electronic governor units for wear, contamination, or malfunction.

## OVERHAUL &

### RECONDITIONING - 0 2

Complete disassembly, ultrasonic cleaning, and part replacement with genuine or approved spare parts.

## CALIBRATION &

### ADJUSTMENT - 0 3

Fine-tuning of speed regulation parameters in accordance with engine maker specifications.

## FUNCTIONAL TESTING

### & VALIDATION - 0 4

Bench testing and real-time performance checks to ensure proper control under load.

# NAVIGATION ELECTRONIC SERVICE

---

With a reputation for excellence in the maritime industry, we are dedicated to providing top-notch solutions to meet all your vessel's electronic needs.

Our team of skilled technicians and engineers is well-versed in the latest advancements in ship electronics, ensuring that you receive cutting-edge technology and unparalleled expertise.

At our ship electronics service, we offer a comprehensive range of services, including installation, maintenance, and repair of a wide array of electronic systems.

Whether it's navigation equipment, communication devices, or integrated control systems, we have the knowledge and experience to optimize their performance, ensuring your vessel operates efficiently and safely.

# NAVIGATION ELECTRONIC SERVICE

Customer satisfaction is our priority, and we take pride in building strong, long-term relationships with our clients.

Our personalized approach means we work closely with you to understand your specific requirements and tailor our services accordingly.

Rest assured that your vessel's electronic systems are in capable hands with our dedicated team, available 24/7 to provide prompt assistance whenever and wherever you may need it.

Experience the difference our ship electronics service can make for your vessel. Get in touch with us today for a consultation and discover how we can elevate your maritime experience to new heights.

# CRANE MAINTENANCE & REPAIR SERVICE

---

Dock Side, we provide expert maintenance and repair services for marine deck cranes to ensure safe, smooth, and uninterrupted cargo handling operations.

Marine cranes are critical for port operations and onboard logistics. Malfunctions can lead to operational delays and safety risks. Our skilled technicians are equipped to handle all types of shipboard cranes, including hydraulic, electric, and electro-hydraulic systems.

# WHAT DO OUR SERVICES INCLUDE?

## **Periodic Inspection & Load Testing**

Visual checks, functional tests, and load simulations in compliance with class and safety standards.

## **Hydraulic & Mechanical Repairs**

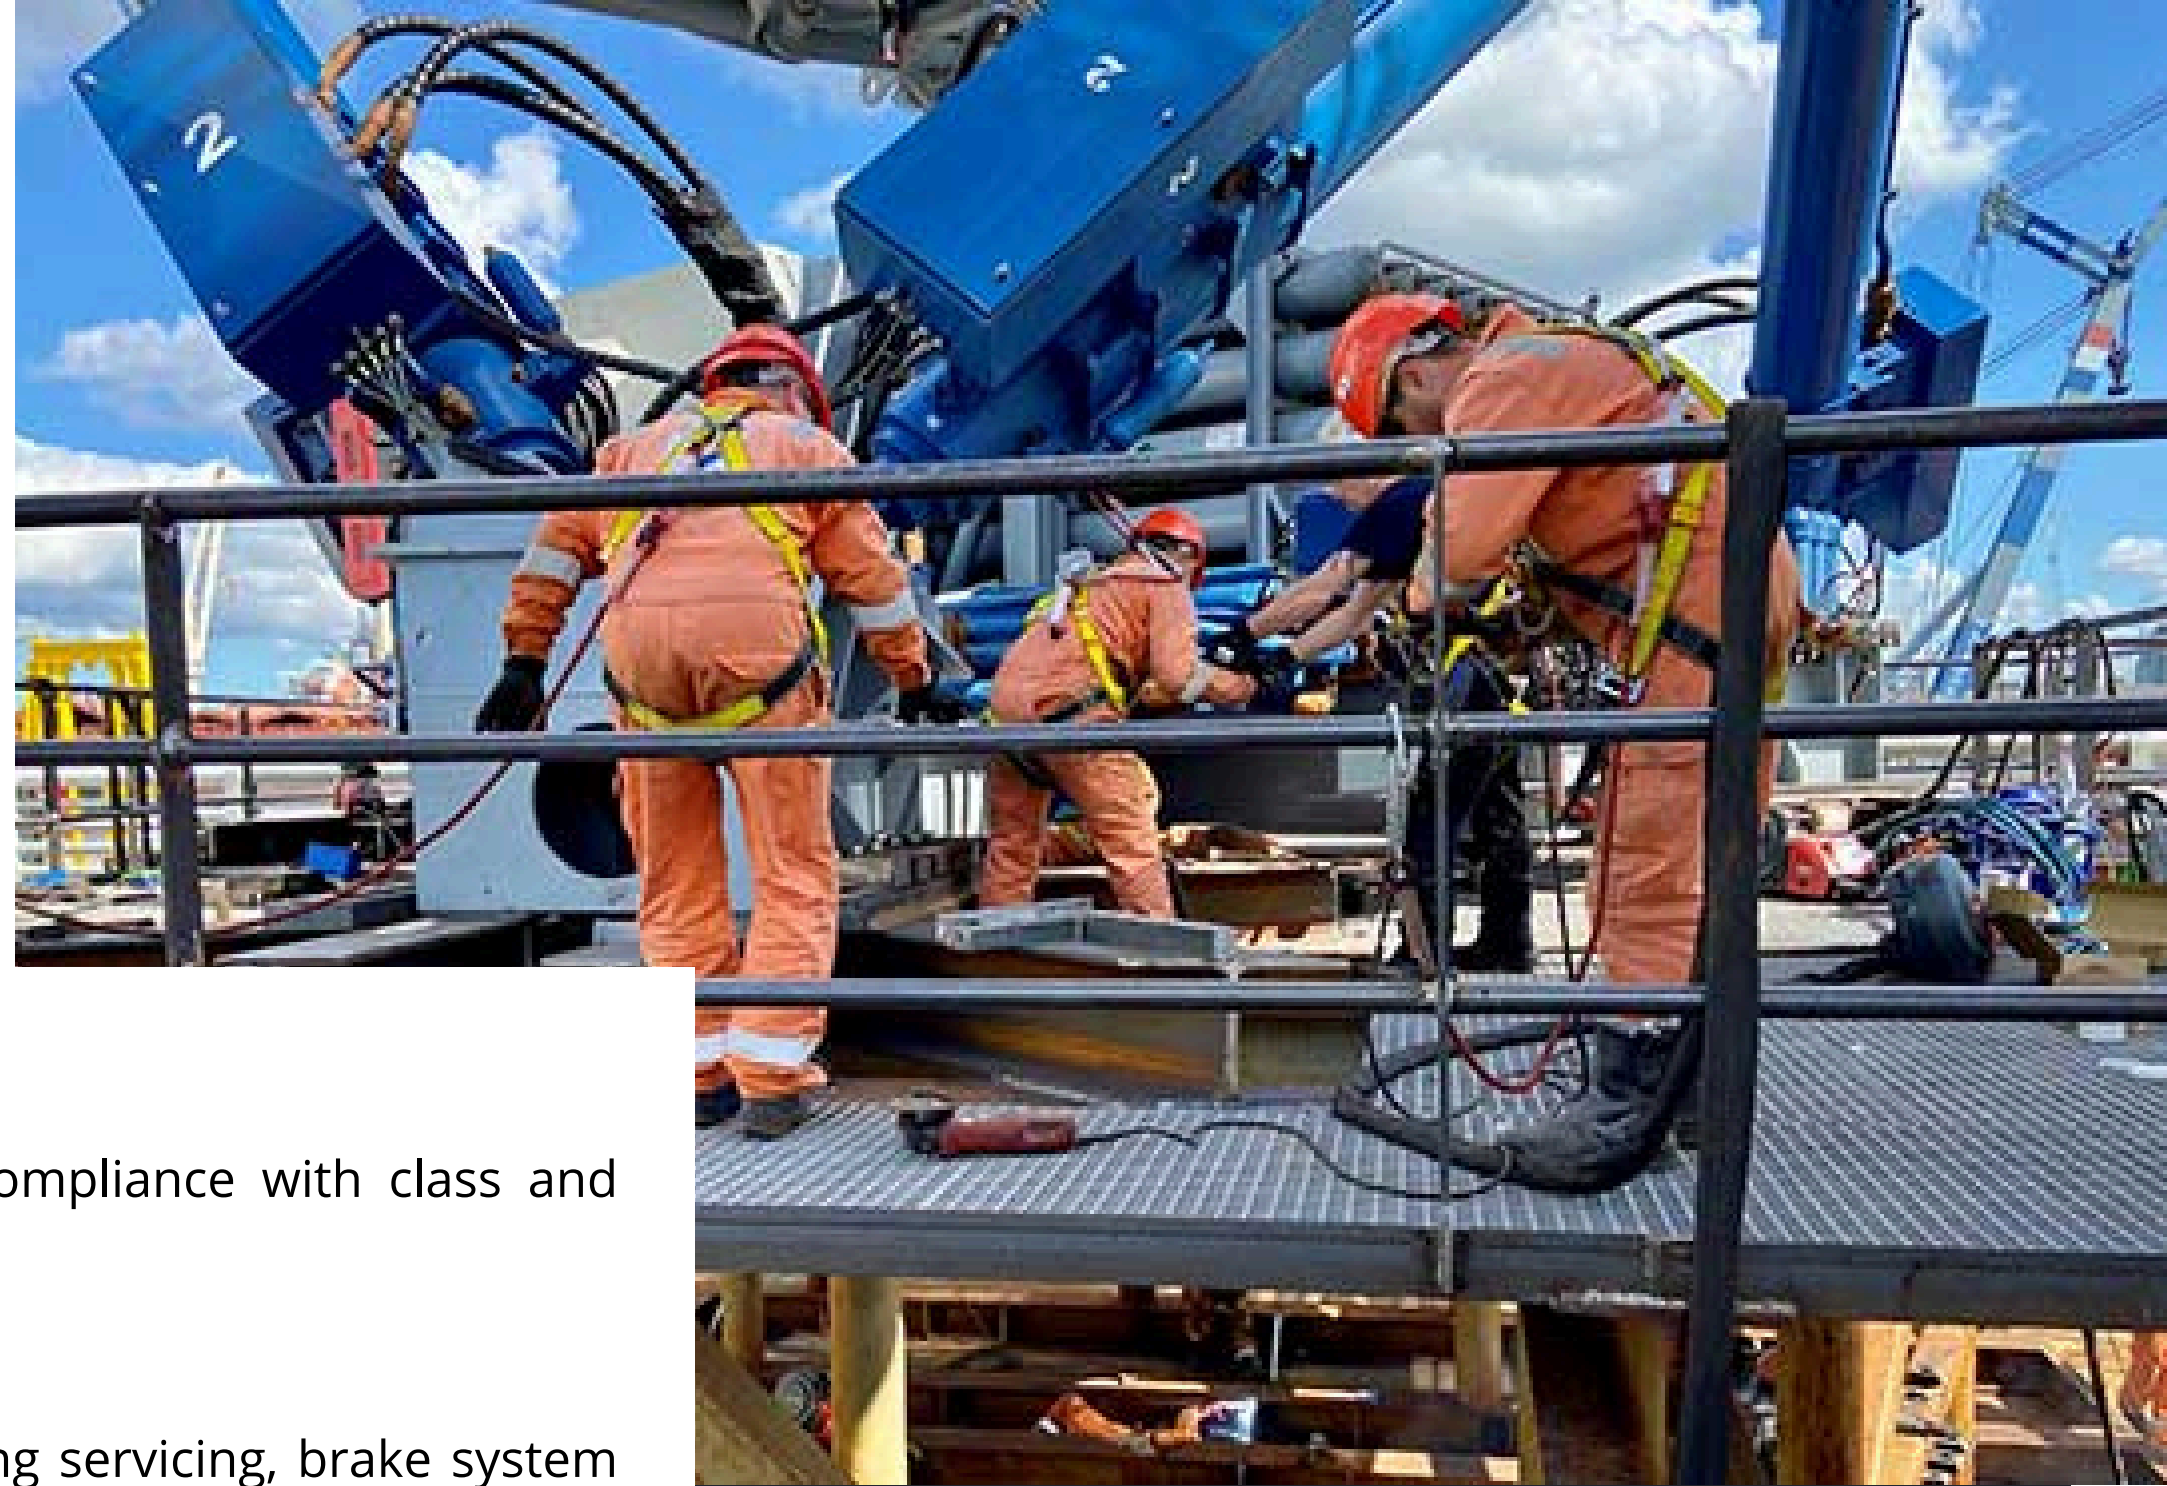

Cylinder seal replacements, hose renewals, gear and bearing servicing, brake system overhaul.

## **Electrical & Control System Diagnostics**

Troubleshooting and repair of control panels, limit switches, relays, and motor drives.

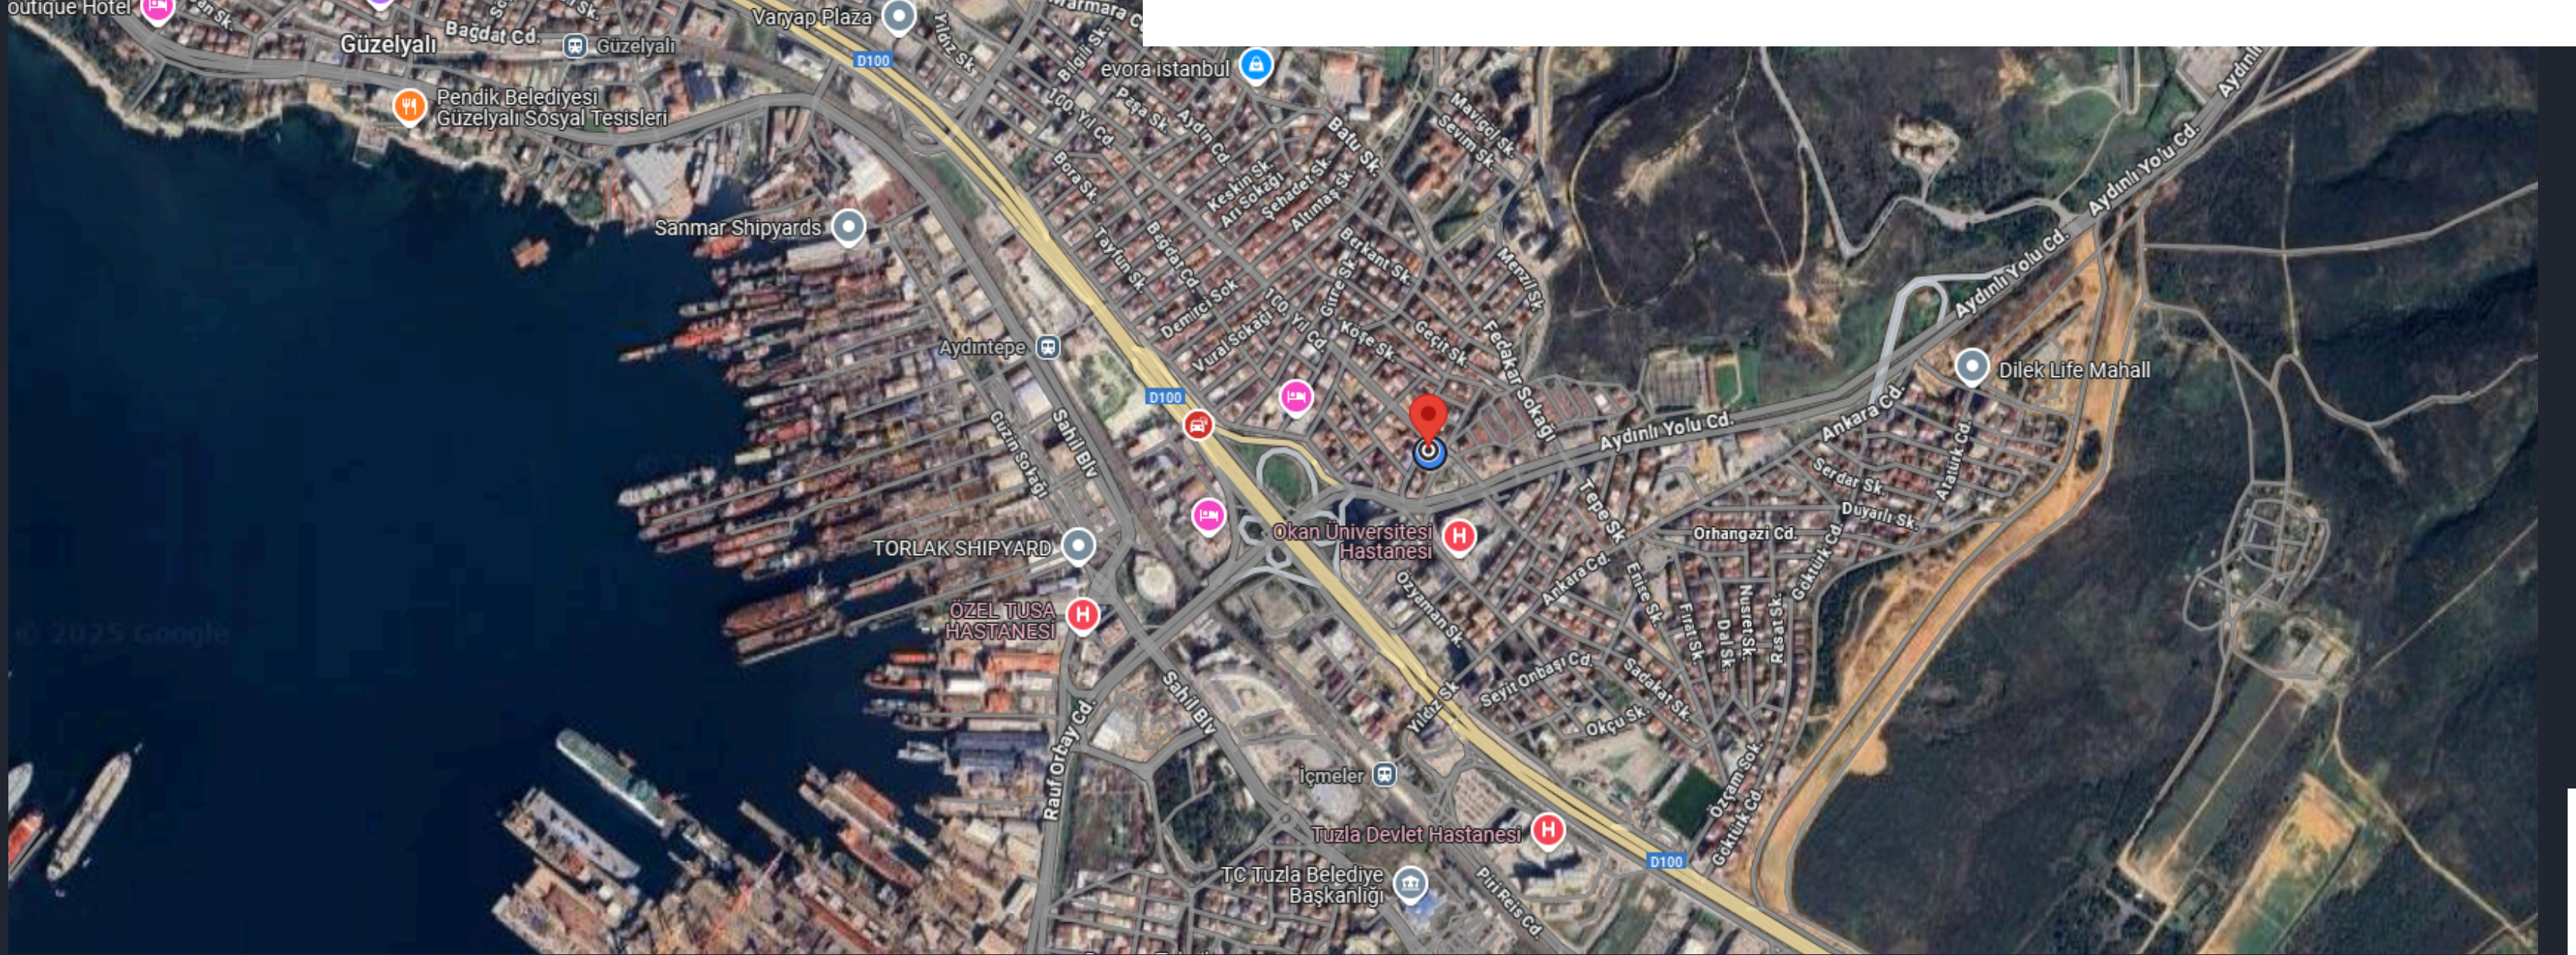

## **Preventive Maintenance Programs**

Customized service plans to extend crane lifespan and prevent unplanned downtime.
